## 1 About

# TOMIS MARITIME EXPO

**Tomis Maritime Expo** is an event dedicated to showcasing the latest technologies and services in the maritime industry. This event is part of **Maritime Business Week**, a week dedicated to exploring opportunities and developments in the maritime industry, bringing together opinion leaders, professionals, and innovators in the maritime field to discuss, learn, and build the future. Additionally, during Maritime Business Week, thematic conferences and workshops are held simultaneously at the same location, providing even more opportunities for knowledge exchange and professional development.

The fair represents a unique platform for exhibitors to present their products, services, and expertise to an audience of industry specialists, opinion leaders, and individuals interested in the maritime industry. By participating in this event, exhibitors have the opportunity to connect with key players in the maritime sector, establish valuable partnerships, and explore new business opportunities.

Together for your business

# CONSTANȚA CHAMBER OF COMMERCE, INDUSTRY, SHIPPING AND AGRICULTURE

Constanța Chamber of Commerce, Industry, Shipping and Agriculture (CCINA Constanța) is an autonomous, legal entity, non-governmental, of public utility, apolitical, non-profit organization, created to represent, defend, and support the interests of its members and the business community in relation to public authorities and organizations both domestically and internationally.

With over 30 years of experience in organizing events and exhibitions, CCINA Constanța has established itself as a reliable partner for companies in various fields. With vast expertise and deep market knowledge, CCINA has consistently met expectations regarding the organization and management of major events, while also demonstrating a constant commitment to supporting companies in achieving profitable partnerships by connecting them with potential business partners and facilitating B2B meetings.

Through the organization of Maritime Business Week, CCINA Constanța aims to achieve several important objectives:

- Bringing together the business community in the maritime sector;
- Facilitating connections and partnerships;
- Promoting the local and regional maritime industry;
- Encouraging innovation and the exchange of ideas.

## 2 Constanța Port

# CONSTANȚA PORT

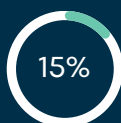

The Port of Constanța benefits from an advantageous geographical position, being situated on the Pan-European transport corridor Rhine-Danube. The Port of Constanța plays a major role in the European intermodal transport network, being favorably located at the intersection of trade routes that connect the markets of landlocked countries in Central and Eastern Europe with the Transcaucasian region, Central Asia, and the Far East.

Situated on the western coast of the Black Sea, 179 nautical miles from the Bosphorus Strait and 85 nautical miles from the Sulina Branch, through which the Danube flows into the sea, the Port of Constanța covers a total area of 3,926 hectares, of which 1,313 hectares are land and 2,613 hectares are water. The two breakwaters located in the north and south protect the port, creating optimal safety conditions for port activities. Currently, the total length of the North Breakwater is 9.4 km, and that of the South Breakwater is 5.56 km. The Port of Constanța is served by 156 berths, of which 140 are operational. The total length of the quays is 32 km, and the depths range between 7 and 19 meters. These characteristics are comparable to those offered by the most important European and international ports, allowing access for tankers with a capacity of 165,000 dwt and bulk carriers with a capacity of 220,000 dwt (dwt = deadweight tonnage).

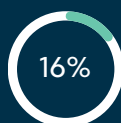

The Port of Constanța is both a maritime and a river port. The facilities offered by the Port of Constanța allow the docking of any type of river vessel. The connection of the Port of Constanța with the Danube is achieved through the Danube-Black Sea Canal, which represents one of the main advantages of the Port of Constanța. Due to the low costs and significant volumes of goods that can be transported, the Danube is one of the most advantageous modes of transport, providing an efficient alternative to the congested road and rail transport in Europe.

## 3 Exhibitors

Exhibitors at Tomis Maritime Expo have the unique opportunity to showcase their products, services, and innovative solutions to an audience of top professionals in the maritime industry. Participation in this event provides direct access to potential business partners, clients, and opinion leaders, thereby facilitating the creation of new collaborations and strengthening their market position.

# COMVEX

## dry bulk terminal

COMVEX S.A. este cel mai mare terminal pentru operarea materiilor prime solide vrac din arealul Marii Negre, acoperind o suprafață de 78 ha în sudul Portului Constanța, România.

Terminalul de Minerale COMVEX este lider pe piață, specializat în manipularea, depozitarea și transbordarea materiilor prime solide vrac cum ar fi: minereu de fier, cărbune, cocs, bauxită, dispunând de facilități complete și moderne de operare situate în Portul Constanța.

Pe lângă Terminalul de Minerale existent, COMVEX a dezvoltat un Terminal de Cereale în Dana 80. Locația oferă avantaje logistice importante, respectiv: cea mai adâncă dană din Marea Neagră, vecinătatea cu terminalul de barje, acces direct și ușor la calea ferată și la autostrada A2. Astfel, COMVEX oferă producătorilor de cereale posibilitatea livrării producției obținute pe nave de mare capacitate, până la 120.000 tdw.

COMVEX S.A. is the largest bulk raw material handling terminal in the Black Sea area, covering about 78 ha total surface in the South of Constanta Port, Romania.

COMVEX Minerals Terminal is the market leader, specialized in handling, storing and transshipment of dry bulk minerals such as iron ore, coal, coke, bauxite, operating from a modern and fully equipped facility location in the Constanta Port.

Apart from the existing Minerals Terminal, COMVEX has developed a Grain Terminal in Berth 80. The location provides important logistic advantages, respectively: the deepest berth in the Black Sea, vicinity with the barges terminal, direct and easy access to the railway and to highway A2. Thus, COMVEX provides grain producers the possibility to deliver the obtained production on large capacity ships, up to 120,000 tdw.

*Your most reliable partner in  
port services*

Socep - one of the most important port operators in Constantza Port - is defined by two distinct terminals and offers a full range of services and operations for containers, bulk and general cargo.

Container Terminal operates in two berths: 51 and 52, having a total length of 470 m and a platform of 150.000 sqm.

The Bulk & General Cargo Terminal has 8 operational berths: 8, 22, 35, 36, 37, 41, 42 and 43, with a length between to 90 meters and 210 meters.

Socep has qualified and trained employees in loading / unloading and storage a variety of cargo, including:

- Cereals
- Fertilizers
- Steel products
- Heavy-duty cargo
- Timber

# ROMANIAN PORTS DEVELOPMENT ASSOCIATION

STAND  
13

**Romanian Ports Development** is an employers' organization established to defend the economic and social interests of port operators in the water transport sector and related services. Among its partners are Umex, DBSchenker, ADM, Rotrac, Silk Group, DTS, SRS, MLH, Fast Freight, Airborne, Chimpex, Medrom, and Inland Shipping.

One of the notable members of RPD is **FAST FREIGHT**, your partner from Constanța, Romania, and Castellon, Spain since 2009, providing comprehensive services including transport, customs brokerage, storage, and delivery for goods ranging from standard to unconventional types. Fast Freight offers a full range of services through its own warehouses and serves as the exclusive agents for Medkon Lines and Sea Lead in Romania. Whatever your requirement, it can evolve into an order where you gain a partner who can assist you.

Another valuable member of RPD is **UMEX S.A.**, established in 1978, which has expanded its service and operational area over the years and continues to invest in specialized handling and storage systems to enhance port operation standards. UMEX S.A. aims to meet logistic challenges by consistently investing in new technical facilities aligned with industry-specific requirements.

Black Sea Offshore Centre - BSOC™ is a Romanian integrated consortium company specialized in integrated support for civil, petro-chemical, offshore & marine industries covering with the subsidiaries technical studies, risk studies, complex engineering, construction, transport & installation, commissioning & start-up, inspections and logistic support.

**Blue Lines** is a consulting naval architecture and marine engineering company, founded in 2004 with headquarters in Constanta, Romania.

We are a team of 30 specialists in naval architecture and structural engineering that focuses on delivering complete designs for various types of ships, offshore platforms and floating establishments. Our team has expertise in marine and offshore standards and rules including those set by DNV, LR, ABS, RINA, BV, PRS, RS, SOLAS, MARPOL, EEMUA, and others.

Blue Lines services range from vessel concept design through basic (Class approved functional design) and detail design to the development of production information for shipyards. Our expertise covers all essential naval architecture and marine engineering disciplines, including hydrodynamics, structural engineering, mechanical systems, piping, electrical systems, instrumentation and outfitting.

Each project has its distinct priorities and tasks. Committed to quality, our team works with cutting-edge software solutions and procedures to translate designs into reality. Specialized in delivering comprehensive documentation and files essential for the production process, we use the latest 3D modeling tools and 2D drafting software. Furthermore, by using unique in-house custom-made applications, we can offer complex engineering solutions, improving our quest for INNOVATION.

## CERONAV

**STAND  
38**

**CERONAV** is a training center in Europe that provides courses under the following five standards: STCW, OPITO, NAUTICAL INSTITUTE, GWO and Directive (EU) 2017/2397.

Courses under the GWO standard contribute to the continuous improvement of safety in the wind turbine industry. CERONAV has equipment of the highest standards and a team of professionals providing four BT – GWO modules (Basic + Refresh): Basic First Aid, Basic Handling Manual, Fire Awareness Basic, Sea Survival Basic. The Enhanced First Aid (Basic + Refresh) programme is also accredited.

DP Training Center of CERONAV is a center in Europe with a portfolio of 6 Dynamic Positioning courses, accredited by the Nautical Institute: DP Induction, DP Simulator, DP Sea Time Reduction, DP Revalidation, DP Refresher and Competency, and DP Vessel Maintainers.

CERONAV Galati, the inland navigation unit, has practical training facilities that ensure the highest standards of quality, security and safety of the activities performed on board the river vessels by the graduates of the training programmes, fully equipped with compliant training facilities, both for theoretical and practical training, according to Directive (EU) 2017/2397.

Since its establishment, CERONAV has constantly evolved to meet the requirements of the maritime industry and to be in accordance with the international standards and deliver the best quality training services. Thus, CERONAV has become the training center with a large offer for the waterborne transport sector in the European Union.

# COMPASS PROJECTS & LOGISTICS

**COMPASS Projects & Logistics Romania** offers tailor-made project management solutions for heavy and oversized cargo. We serve the major industries including general, industrial cargo, offshore and defense connected logistics.

Our proven experience in the industry is showcased by our loyalty to our clients and many jobs well executed. Our dedicated teams and resources allow us to create and execute solutions and live up to your highest standards and expectations.

We base our business on our four established pillars for excellence: information and confidentiality, transparency and fair partnership, 24/7 customer service and support and professionalism and full involvement. No matter the size of the job, we dedicate 100% of our attention in order to make and keep our clients satisfied.

Our core activities are:

- project management
- sts/direct transshipment
- loading and discharging via quay
- warehousing and consolidations
- cargo securing/lashing
- condition and claim surveys
- import/export and transit clearance
- national and international transport

# MARINE CLUSTER BULGARIA

STAND  
4

Marine Cluster Bulgaria (MCB) is an NGO located in Varna, Bulgaria, that brings together all sectors of Bulgaria's maritime economy. Our mission is to create favorable conditions for development and enhance the competitiveness of the blue economy. We achieve this by introducing innovative organizational, product, market, and technological solutions, implementing best practices, and promoting the sector both nationally and internationally.

MCB consists of SMEs, branch chambers and associations, and educational and R&D organizations covering a wide range of marine and maritime activities in the value chain of the Blue Economy sectors in Bulgaria. Our members work in diverse maritime sectors, including agency services, brokerage, water transport, ship management, supply, logistics, vessel certification, ship design, repair, R&D, marine engineering education, and maritime law. Additionally, they contribute to tourism, fisheries, and other blue economy sectors.

MCB is a National Hub of the Black Sea Assistance Mechanism, supporting the implementation of the Common Maritime Agenda for the Black Sea and is a host organization of the Enterprise Europe Network (EEN).

Since 2007, MCB has established numerous partnerships with business organizations on both national and international levels. Marine Cluster Bulgaria is established with the clear vision to promote good business relationships and the conviction that together we can achieve more.

# NAVTRON

STAND  
17

Founded in 1998, NAVTRON has established itself as a leader in marine electronics in Romania and the surrounding regions. With sustained growth and the support of professionals, we take pride in our reputation and accomplishments, continuously enhancing the quality of equipment, systems, and services provided.

NAVTRON is a member of ISES (International Ship Electrical and Engineering Service Association) and exclusively represents a wide range of manufacturers in the Romanian market. Our engineers, trained by these manufacturers, ensure technical and commercial support for our partners, maintaining excellent and lasting relationships.

We offer comprehensive solutions for:

- Leisure market: from basic equipment to systems for large yachts
- Commercial market: from technical vessels to high-capacity cargo ships
- Governmental market: from patrol boats to the Navy
- Coastal infrastructure: communication, signaling, and surveillance
- Hydrography, hydrology, oceanography, and meteorology

Our success in managing diverse applications, despite not being a large company, demonstrates our openness to new projects and related fields. We continue to expand our range of products and services, while adhering to professionalism and our area of expertise. We strive to constantly maintain and improve relationships with our customers and suppliers.

# MARITIME UNIVERSITY OF CONSTANȚA

The **Maritime University of Constanța (UMC)** considers internationalization an essential factor for improving the quality of higher education. **UMC** complies with national regulations established by the **Ministry of Education**, through the **Romanian Agency for Quality Assurance in Higher Education (ARACIS)**, and, as a maritime institution, adheres to international standards set by the **International Maritime Organization (IMO)** and the **Romanian Naval Authority (ANR)**. These regulations define the normative framework of the global maritime industry concerning navigation safety and marine environment protection. In this context, **UMC's study programs** comply

with academic standards and the provisions of the **STCW 78/95 Convention**, as well as the **Manila Amendments**.

Research and scientific collaboration play a crucial role in the internationalization process. **UMC** is an active member of two major international networks with high potential for student and faculty mobility and joint research programs: the **International Association of Maritime Universities (IAMU)** and the **Black Sea Association of Maritime Institutions (BSAMI)**. The university is committed to maintaining and strengthening cooperation with partners in these networks.
